

Remote Access to a Clemson managed Windows computer from a Mac

Article Number: 1282 | Last Updated: Wed, Aug 3, 2022 at 10:08 AM

HOW TO CONFIGURE MICROSOFT REMOTE DESKTOP TO REMOTELY ACCESS A WINDOWS PC FROM A MAC

If you need access to your Clemson managed Windows computer from off campus, here are instructions to do this on a Mac.

Click on the **Apple logo** in the top left corner of your screen and open the **App Store**.

Search for **Microsoft Remote Desktop** and download the app.
Enter your

Apple ID and password.

Enter the two-factor

verification code that is sent to your Apple device.

→ Navigate to the

Applications folder and open **Microsoft Remote Desktop** and proceed through the opening prompts. You may be asked if you want to share technical information with Microsoft to help them improve the product, asked to access your microphone and asked about accessing the camera on your computer. Answer based on your needs.

Once

Microsoft Remote Desktop is open, click on the application name in the top left corner and select

Preferences.

Select **Gateways**.

Enter

msrdp.clemson.edu for the Gateway name, **Clemson University** for the Friendly name, and **Use PC User Account for the user account**. Click the **Add** button.

On

Microsoft Remote Desktop screen, click **Add PC**.

On the next Microsoft Remote Desktop screen,

enter your PC name as recorded from the PC you want to connect to - ending in **.campus.cu.clemson.edu**.

Select the Gateway **Clemson University**.

Select **Display** and change any appropriate settings. For instance, if you'd prefer the remote session to be Posted - Wed, Mar 11, 2020 at 11:42 AM.

Online URL: <https://hdkb.clemson.edu/phpkb/article.php?id=1282>

on the computer you wish to start a remote session.

When prompted, enter your Clemson University username in the format **username@clemson.edu** and your Clemson University **password**. Click **Continue**.

→ Next you

should receive a **DUO push** prompt to your previously configured DUO app (usually on a phone, tablet or watch). Allow the DUO push.

When the Certificate prompt appears, select **Show Certificate**.

Select **Always trust** and then click **Continue**.

Enter your

Mac password when prompted and click **Update Settings**.

The remote session to your

Windows PC should begin. For more information about Clemson remote work options, see
