Click here to go directly to article on: [HOW TO REGISTER A WINDOWS COMPUTER WITH CLEMSON AND INSTALL COMPANY PORTAL COMPANY PORTAL APP OVERVIEW](#) **What is the Company Portal App?** The Company Portal app is a part of Microsoft Intune. Intune is cloud hosted and provides access to local installs of Clemson licensed software without the need for VPN. It installs in minutes and doesn't require VPN to install or use. We also have additional deployment options based on user group membership. Some software may still require VPN to connect to the license server. **How to get the Company Portal App? Student/Employee Personal Windows Devices** Student personal devices that wish to install software on their own using the Company Portal app. Setup instructions can be found at [HOWTO: Register Device with Clemson University](#) or [HOWTO: Install Company Portal - Windows 10](#) **Students with Windows 10 Home** A lot of Clemson software including Company Portal are not compatible with Windows 10 Home. All students are entitled to a free upgrade of Windows Home to Windows Education. Company Portal will automatically upgrade your device after install. Unfortunately, there are no prompts for this so a few minutes after installing Company Portal you will need to manually reboot. You can check the version of Windows in Settings -> System -> About under Windows specifications. **University Owned Windows Devices** University owned devices setup by IT now have Company Portal installed by default. **How to use Company Portal** [How to use Company Portal](#)
