

# HOWTO: Install Company Portal - Windows 10

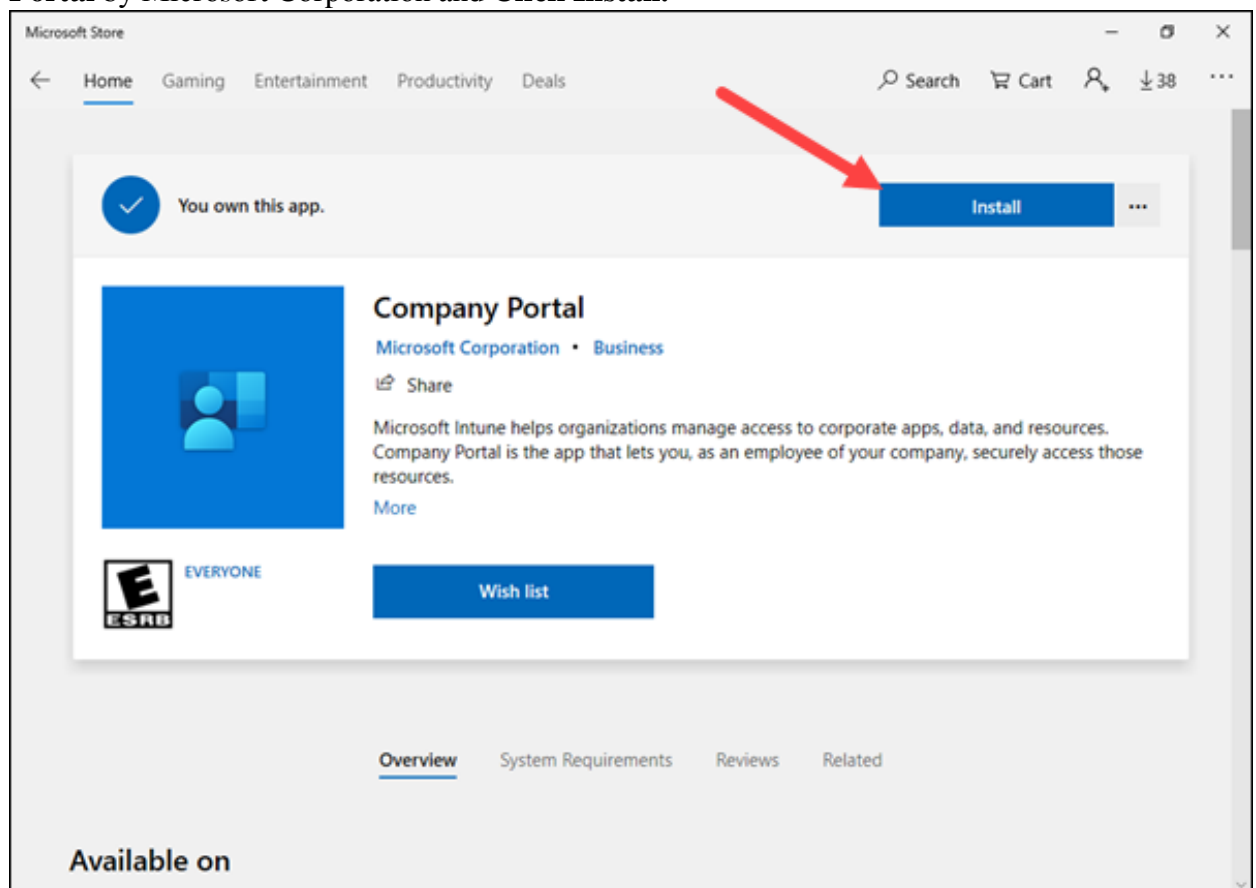

1933 Sam Beckler May 30, 2023 [Software Center](#)

## STUDENTS WITH WINDOWS 10 HOME

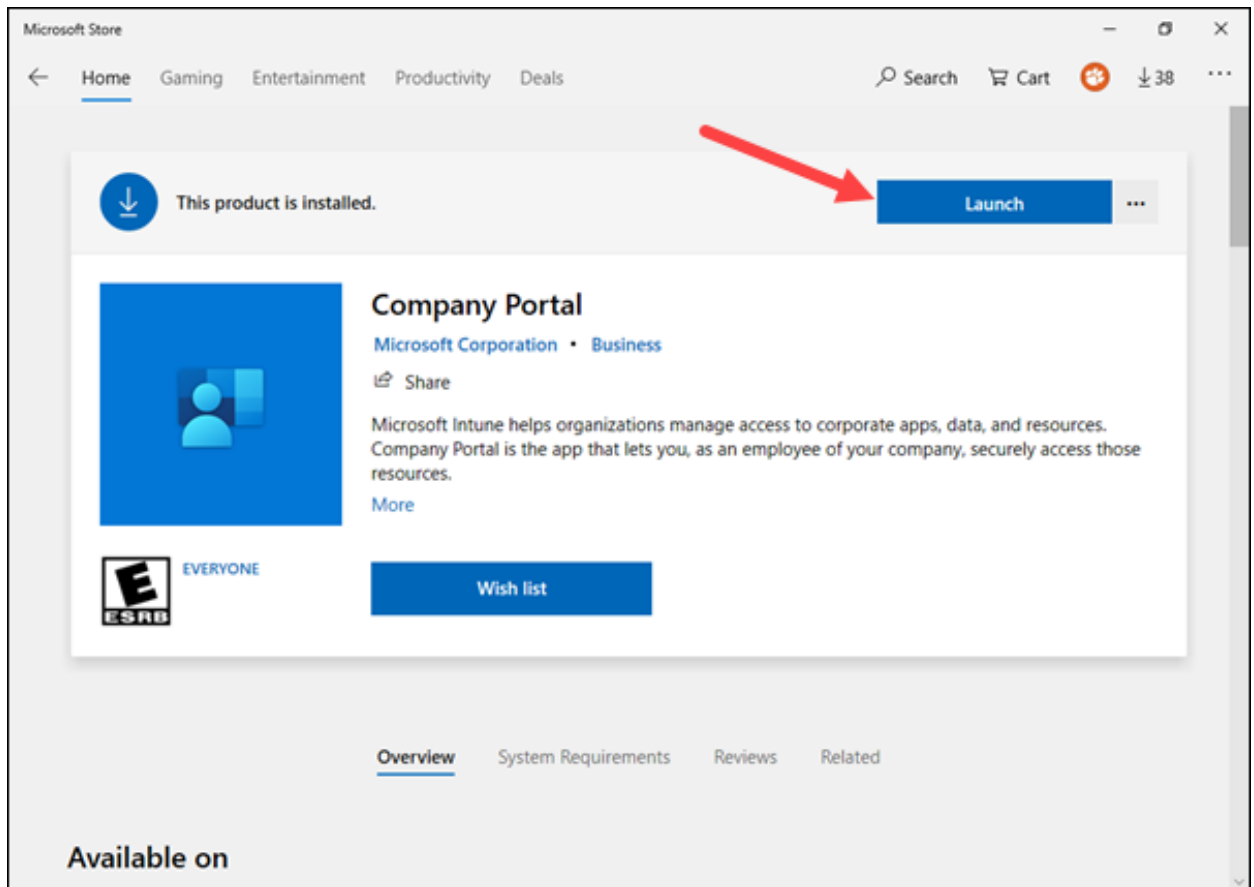

A lot of Clemson software including Company Portal are not compatible with Windows 10 Home. All students are entitled to a free upgrade of Windows Home to Windows Education. Company Portal will automatically upgrade your device after install. Unfortunately, there are no prompts for this so a few minutes after installing Company Portal you will need to manually reboot. You can check the version of Windows in Settings -> System -> About under Windows specifications.

## COMPANY PORTAL INSTALL

1. You can launch Company Portal install from [here](#) or open **Microsoft Store** and find **Company Portal** by Microsoft Corporation and **Click Install**.

2. Once installed **launch** Company Portal

3. Sign in to Intune with [username@clemsan.edu](mailto:username@clemsan.edu)
