MICROSOFT ONEDRIVE IS NOW AVAILABLE IN CANVAS

You can access your Microsoft OneDrive files without ever having to leave your Canvas course. The OneDrive LTI for Canvas is an efficient, simple way to access your OneDrive storage for creating activities and assignments within Canvas, such as simultaneous file editing and distributing fillable forms. You can access OneDrive files via a Course Navigation link or through the external apps tool in the Canvas Rich Content Editor. For instructions and usage cheat sheets, see the links below:
