

# How to see a Google calendar in Outlook

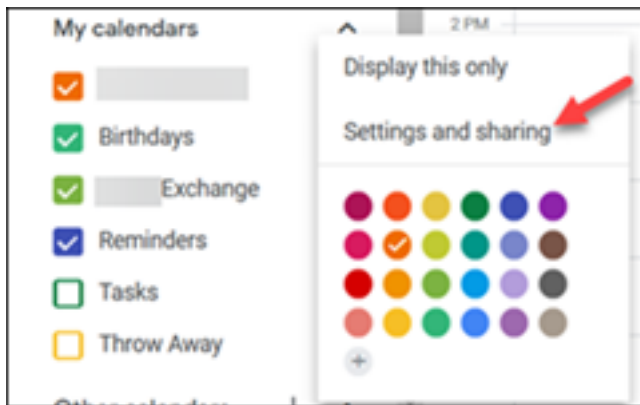

2129 Laurie Sherrod May 24, 2023 [Calendar](#)

These instructions would be helpful for anyone who would like to see a Google calendar in Outlook. This might include students or people who have Android phones with calendars on their phone that they would like to see in Outlook. They may also see the Google calendar and their Microsoft Exchange calendar joined in Outlook. These steps are written for Microsoft 365 version 2008 but would be similar for other versions of Outlook.

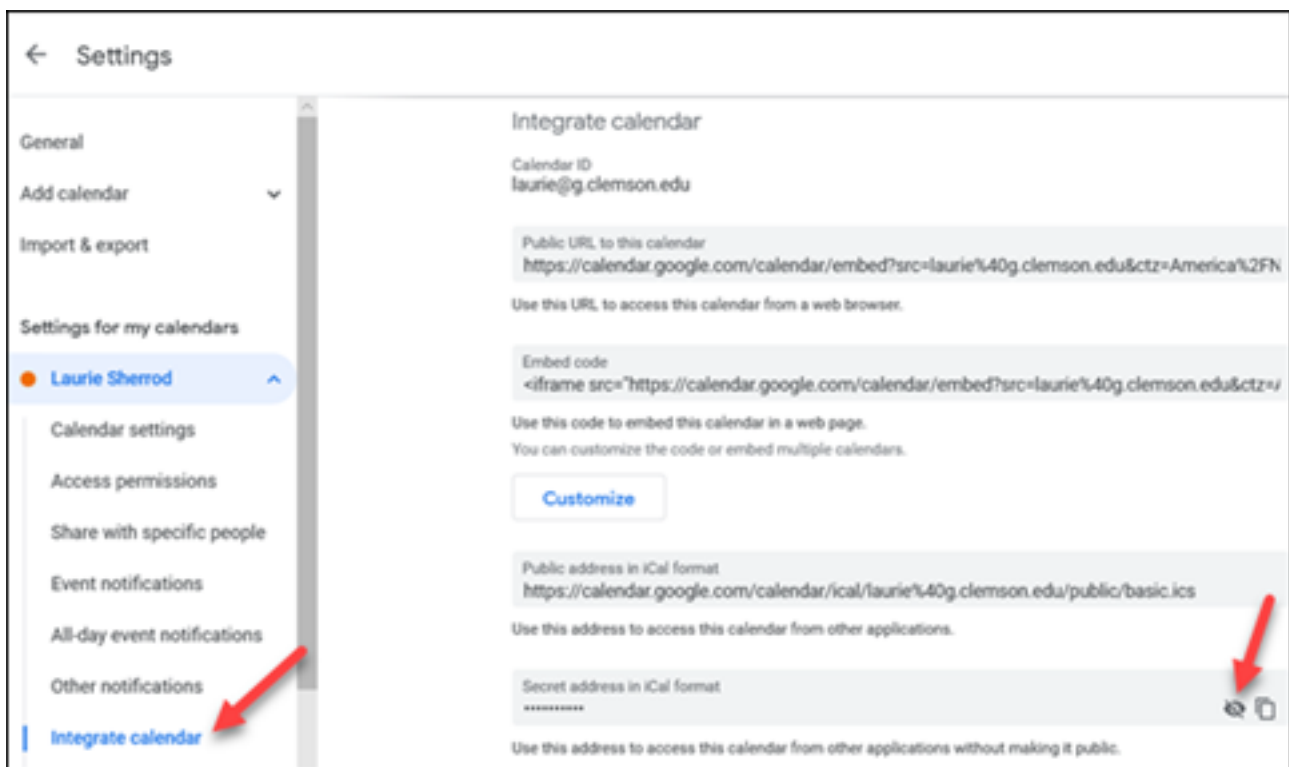

Open your Google calendar in a browser. Under **My calendars** on the left side of the screen, hover your mouse over the calendar you want to display in Outlook. Click on the three dots beside it.

Click on **Settings and sharing**.

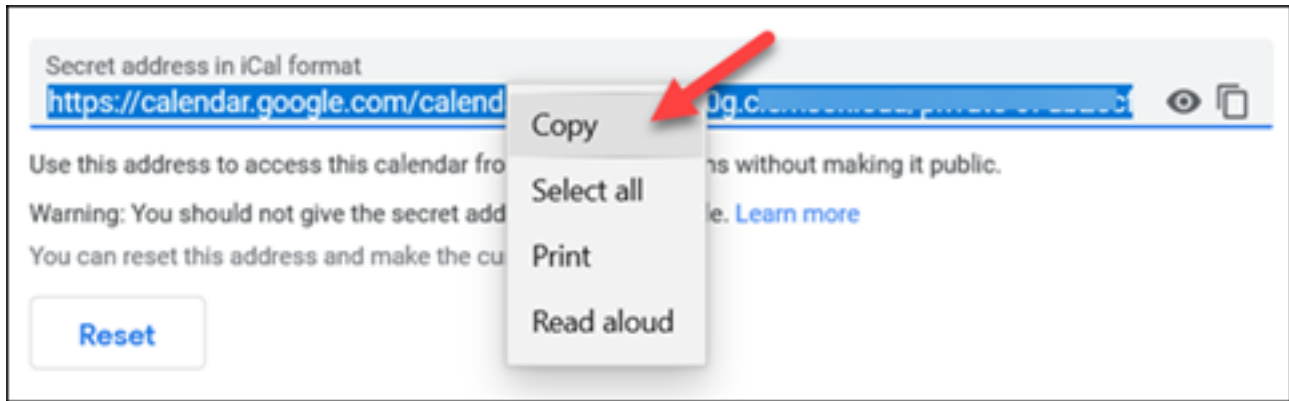

Click on **Integrate calendar** on the left side of the screen. Scroll to the Secret address in iCal format. Click on the toggle visibility icon so you can see the address.

You may get a security warning. Once the visibility is on, you will see a full address.

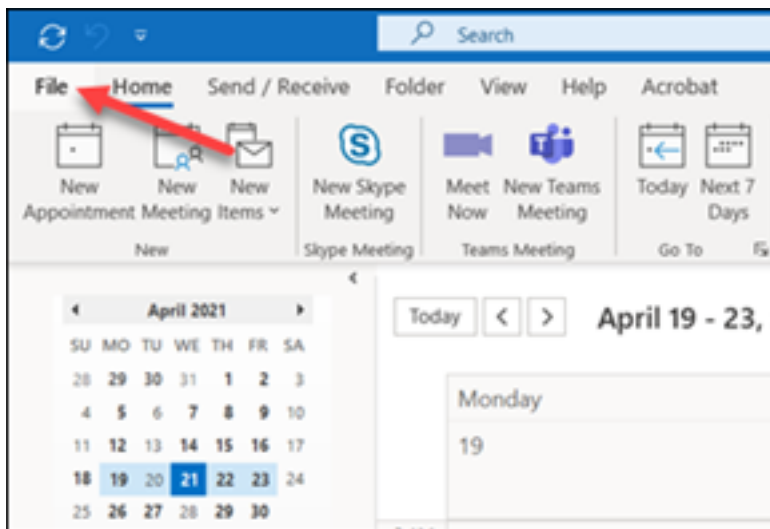

Right click on the address and select **Copy**.

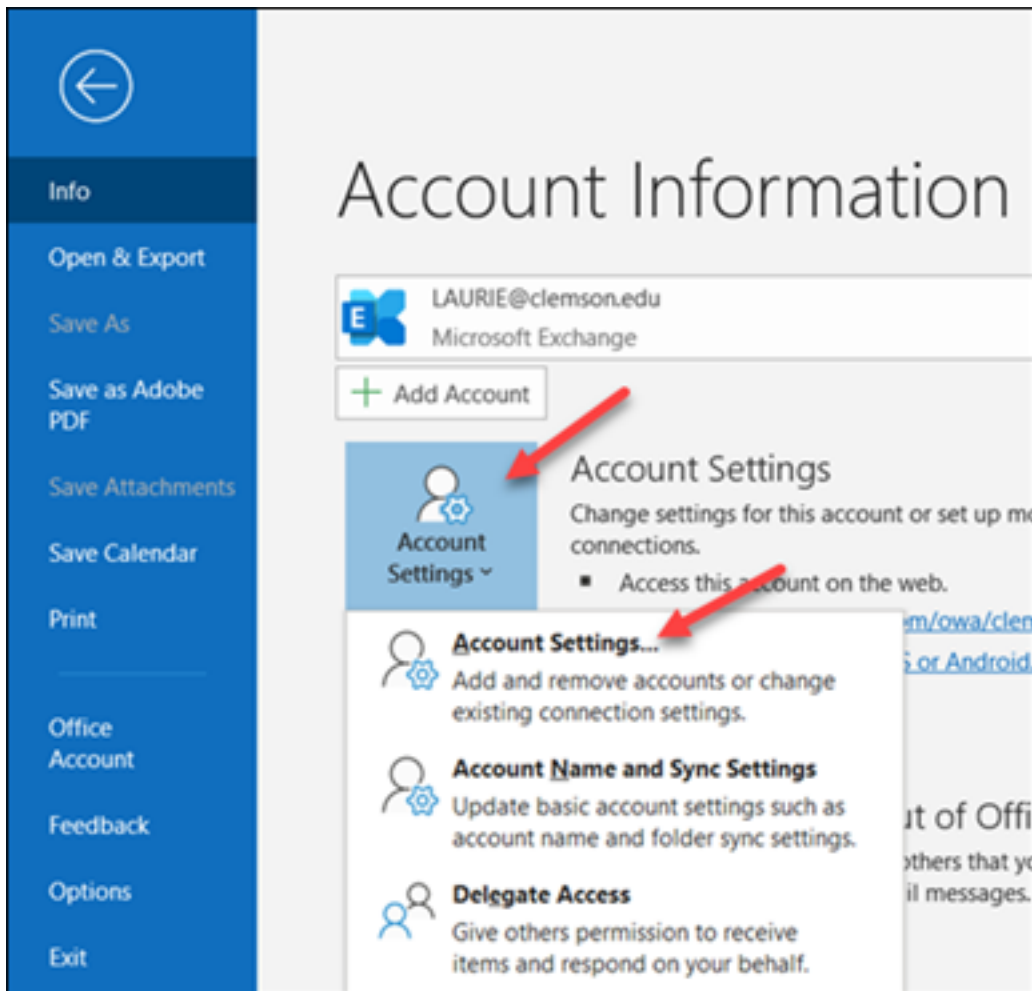

Now open your Outlook Calendar.

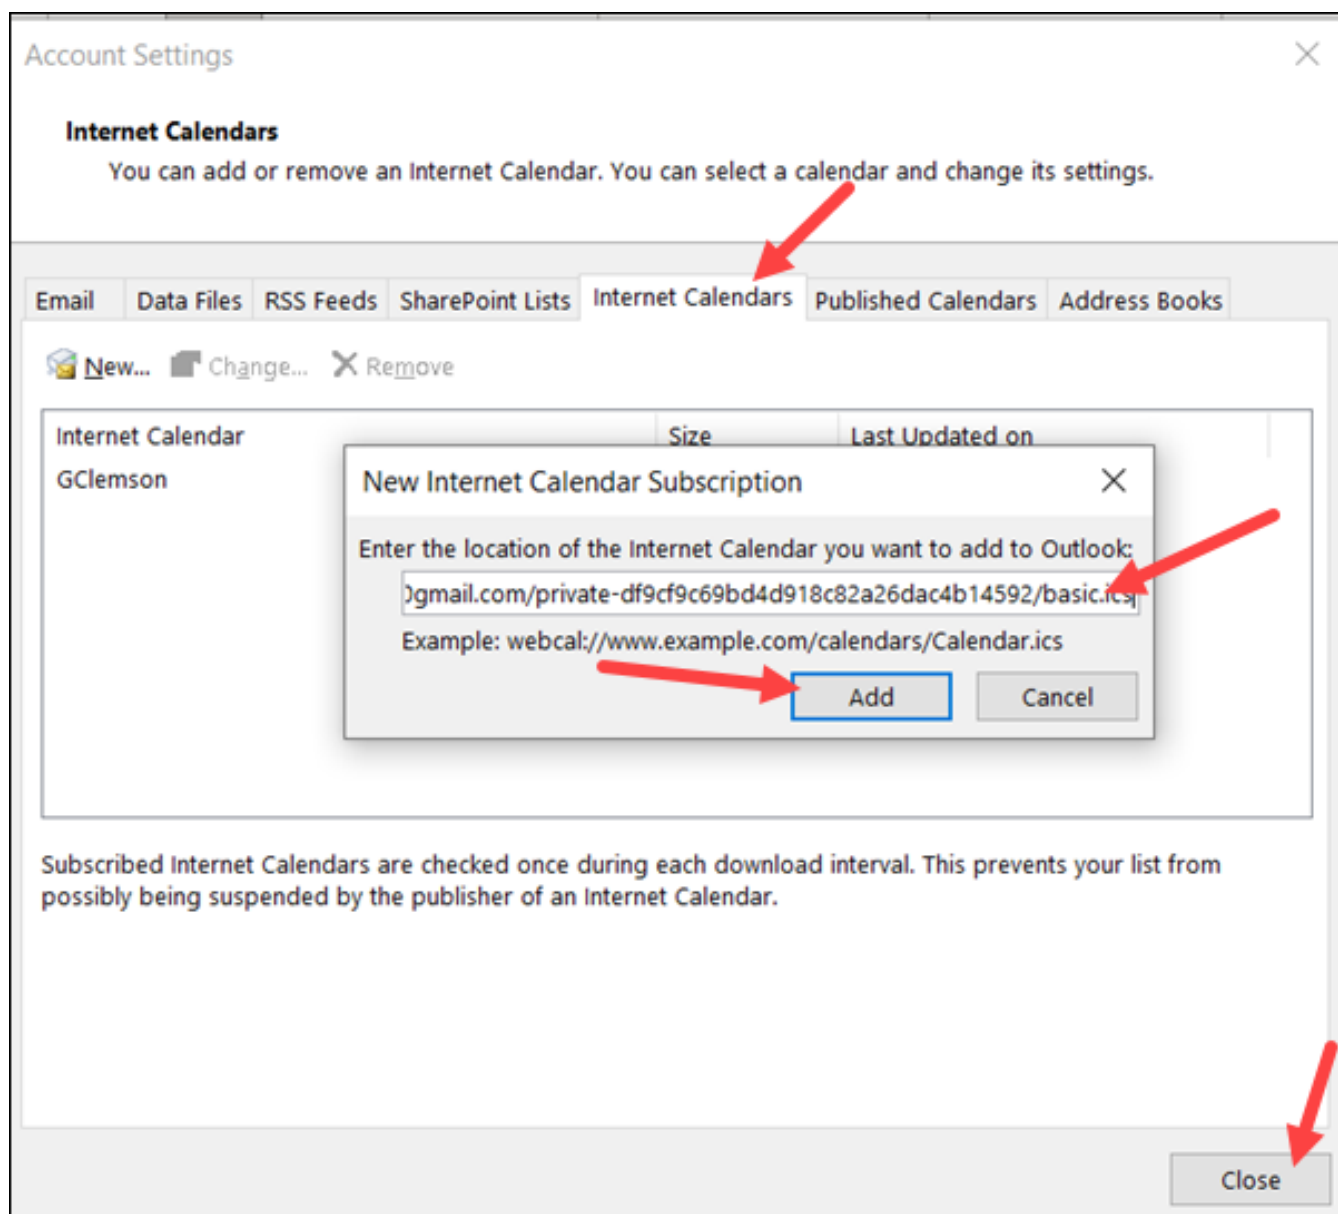

Click on **File**.

Click on **Account Settings**, and **Account Settings**.

Click on **Internet Calendars, New**. Paste in the secret address of the Google Calendar in the New Internet Calendar Subscription box. Then click **Add** and **Close**.

Under Folder name, type in a name for the Google calendar (you will see this name on your Outlook calendar). Click **OK** and **Close**.

Subscription Options

Use the choices below to configure options for this Internet Calendar.

**General**

Folder Name: **GClemson**

Internet Calendar:

Location: <https://calendar.google.com/calendar/ical/1640q.clemson.edu/private-984c2e7/basic.ics>

Description:

☒ Display this calendar on other computers with the account: laurie@clemson.edu

**Attachments**

☐ Download attachments for items in this Internet Calendar

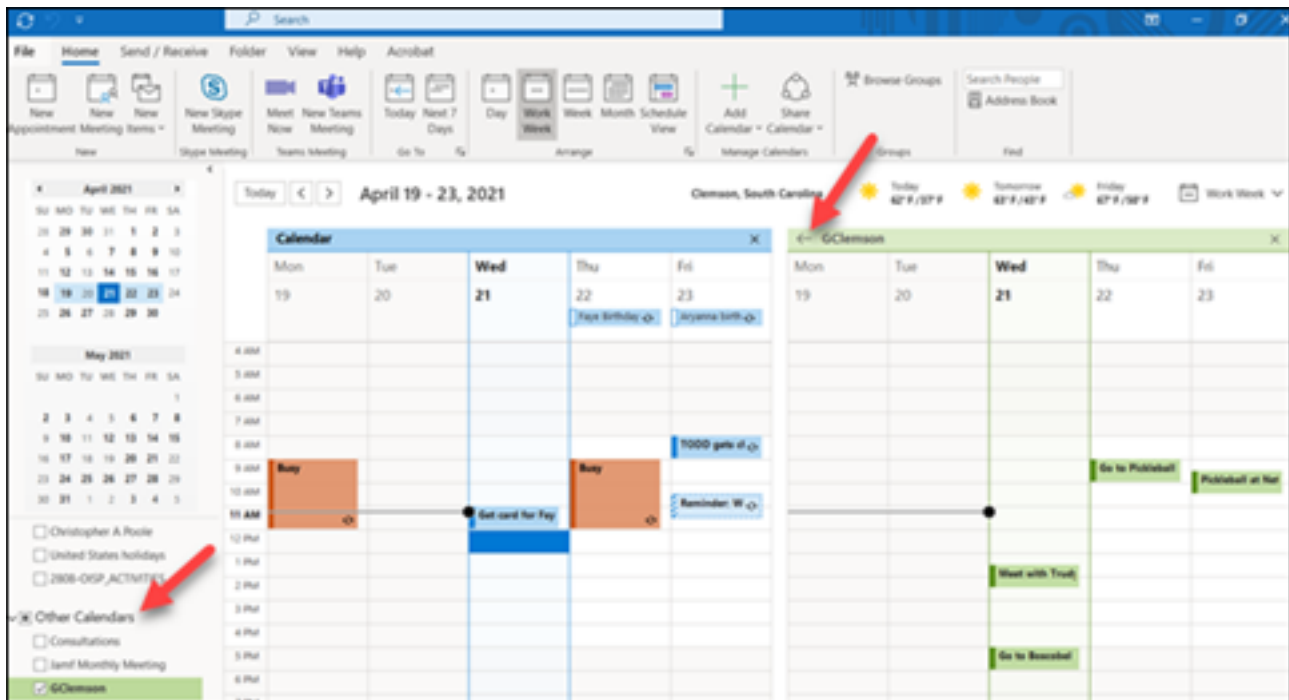

**Update Limit**

☒ Update this subscription with the publisher's recommendation. Send/Receive groups do not update more frequently than the recommended limit to prevent your subscription from possibly being cancelled by the content provider.

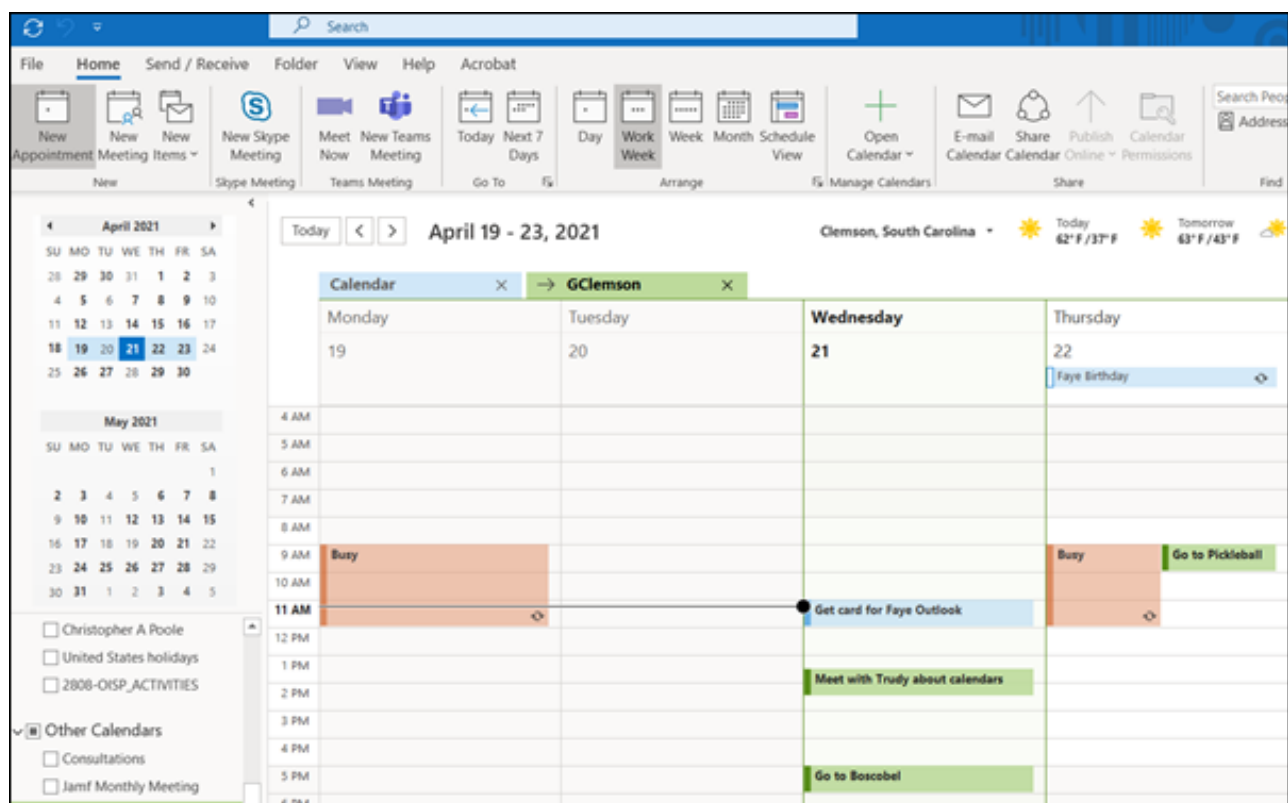

Current provider limit: Not published.

**OK** **Cancel**

If you open your Outlook calendar now and look under **Other Calendars** on the left side of the screen, you should see your new calendar. If you click on it to select it (putting a checkmark beside it), you will see it beside your primary Outlook calendar. If you then click on the arrow beside its name, you will see the two calendars at the same time.

Here is what it looks like with the two calendars joined.
