

Adobe Creative Cloud - how to deactivate without your device

2682 Laurie Sherrod September 7, 2022 [Adobe Creative Cloud](#)

Your Clemson Adobe Creative Cloud can be installed on only two devices. If you need it on a new device you will have to deactivate one of the old devices. If you no longer have access to a device you need to deactivate, here is a link you can use:

Sign in at <https://account.adobe.com/activated-devices>.

Once you log in to this link, you will see your Adobe activated devices. Select **Deactivate** beside the device you would like to remove.

If you have more questions, email ITHELP@clemson.edu or call 864-656-3494.
