

Panorama LTI by Yuja

3040 Laurie Sherrod December 13, 2023 [Teaching & Learning](#)

Panorama LTI is an accessibility checker and alternate formats tool for Canvas. With it, Faculty can identify and fix accessibility issues within their Canvas content and within documents, slides, spreadsheets, and PDFs that are uploaded to canvas. Students can use it to get Canvas pages and the files loaded into Canvas in PDF, audio, and other formats.

TOOL GUIDES

- Yuja Panorama only supports DOC, DOCX, PPT, PPTX, PDF, HTML, TXT, GIF, XLS, XLSX, ODT, ODP, ODS, and RTF files in addition to Canvas content.
- Faculty who customize their Yuja Panorama settings will need to reapply these settings in any newly copied course shells.
- Faculty in the Languages department are strongly encouraged to turn off the "Language Translation" alternate format.
