

Papercut Printing with Mac OS 14 Sonoma

3088 Bryan S. Lee January 29, 2024 [Installation Documentation](#), [Paw Prints Troubleshooting](#), [Printing & Plotting](#), [Software & Hardware](#), [Support & Services](#)

For Macs running Mac OS 14 Sonoma, there are several methods for printing to the Papercut Printing system.

For students:

[Use the studentprinting AirPrint method](#)

For employees:

1. [Use the employeeprinting AirPrint method](#)
2. Use the Employee Printing (Sonoma) printer queue which should be installed by default via the Jamf Management system for university owned Macs. Then you can release the print job at any printer with a swipe release station or via web release on the <https://papercut.clemson.edu> webpage using the "Jobs Pending Release" section.
3. A manually created printer queue installed by your local tech support using the following printer path structure:

Ex: smb://4gi-ppc-p-prt52.campus.cu.clemson.edu/EmployeePrinting
