MANAGING FONTS IN ADOBE CREATIVE CLOUD

If you have Adobe Creative Cloud installed on your computer, you can add fonts through it and those fonts will be available to other applications on your computer.

Log into your Creative Cloud desktop app and go to the f in the upper right part of the screen or select **Manage fonts** from the lower left side of the screen.

If you have previously installed fonts here, you can disable them with the slider button.

If you want to add fonts click **Browse more fonts** in the upper right part of the screen. Your default web browser will open the Adobe Fonts page. From there you can find and activate fonts you want with a slider. Once they are activated, you may need to restart your computer before they appear in your Apps (such as Microsoft Office).
