Instructions created by Bryan S. Lee 2014 (bl@clemson.edu)

for CCIT, Clemson University

Download the Maple18MacInstaller.dmg file from Software Repository.

smb://software.clemson.edu/software/Maple/Mac/Maple18/Maple18MacInstaller.dmg

- Open the Maple18MacInstaller.dmg file. Then run the Maple 18 installer that is contained within it.
- Authenticate with your Mac Administrative password.
- At the "Introduction" screen, click "Next".
- Toggle the "I accept the terms of the License Agreement" radio button and click "Next".
- Do not change the default installation folder unless absolutely necessary. Click "Next".
- Select "Yes" or "No" when prompted about the desktop shortcut. Your choice.
- Select "Network license" when prompted.
- Select "Single Server" when prompted.
- When prompted for the License server address, enter "license6.clemson.edu" (without the quotes). The Port number should be set to 28014. Click "Next".
- When installation is complete, click "Done".
