Installation Instructions for Maya 2016 for Mac

Connect to the Software Repository at smb://software.clemson.edu/software and navigate to the "Autodesk" folder and open it. Then navigate to "Mac/2016 Products" and copy the file "Autodesk_Maya_2016_MAC_OSX.dmg" to your Mac Desktop. Once copied, open the copied dmg file and then double-click on the "Install Maya 2016" icon. Click "Continue". Click "I Agree" and then click "Continue" to agree to the license terms.

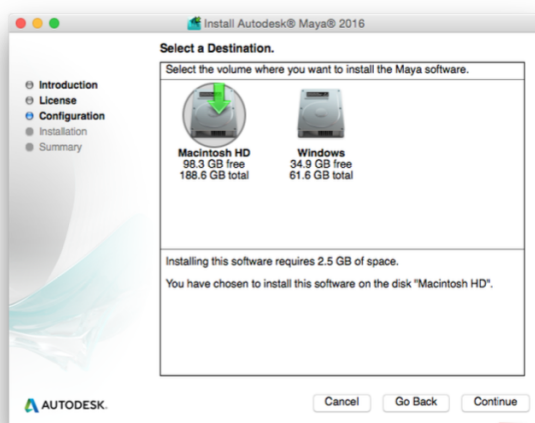

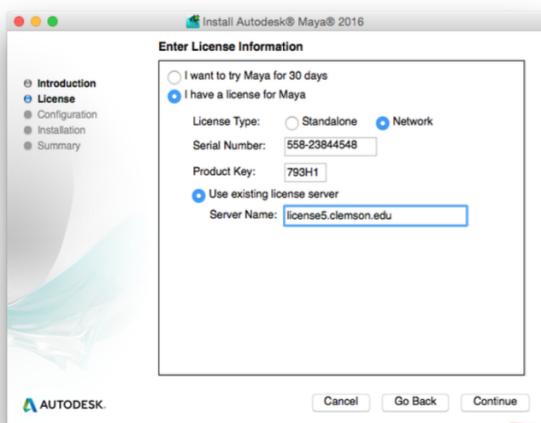

Select "I have a license for Maya". Then select "Network" for License Type. Then enter the following:
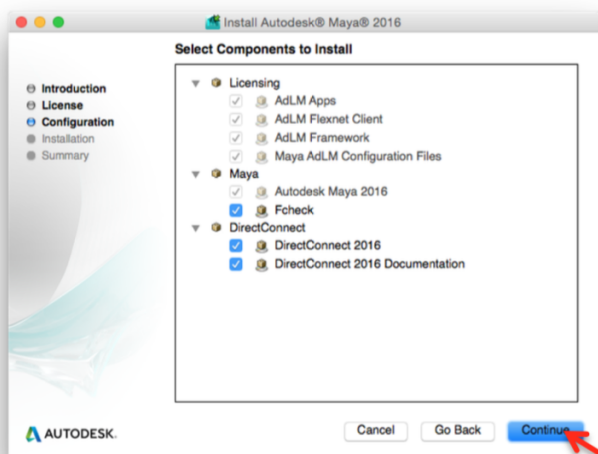

Serial Number: **558-23844548**

Product Key: **793H1**

Server Name: **license5.clemson.edu**

Then click "Continue". Select the installation location and click "Continue".

Select any additional components and then click "Continue". Enter your Mac username and password.

Installation will proceed. After several minutes, a final screen will be displayed. Click "Done" to close the installer.

The Maya 2016 application should appear in the /Applications/Autodesk/maya2016 folder.

For technical issues, please contact the Computer Support Center (ithelp@clemson.edu) at 656-3494.
