

# HOW TO: Download files from the Echo Active Learning Platform

549 Laurie Sherrod May 30, 2017 [Lecture Capture](#)

To download recordings from the Echo 360 ALP Platform ( <http://echo360.org> )

With respect to downloading presentations, the item downloaded is the original file that was uploaded. This means that:

- If the file has not been altered, you will get the same presentation you see in Echo360.
- If slides have been added, they will not appear in the downloaded file.
- If slides have been deleted, they do appear in the downloaded file.
- Interactive activity slides are not included in any download.
- If the file was created in Echo360, the Download original option is grayed out; these presentations do not have an originally uploaded file to download.

Instructors:

- [Download content from your library](#)
- [Download content from the class list page](#)
