

## Banner security popup

580 Faye Buckley August 3, 2017 [iRoar](#)

The following popup is something that is produced by Java when accessing iRoar/Banner and there is no way for CCIT to specifically disable it, however it should not interfere with the usage of iRoar/Banner.

Simply check the box to accept the "risk" and click run.

**Note:** If you are experiencing other issues that impede processes that need to be completed within iRoar/Banner, please see the following guide: [Common iRoar/Banner Errors and Troubleshooting](#)
