5. Click Install**. Follow the instructions (repeated below)

Follow these steps after you have installed the update.

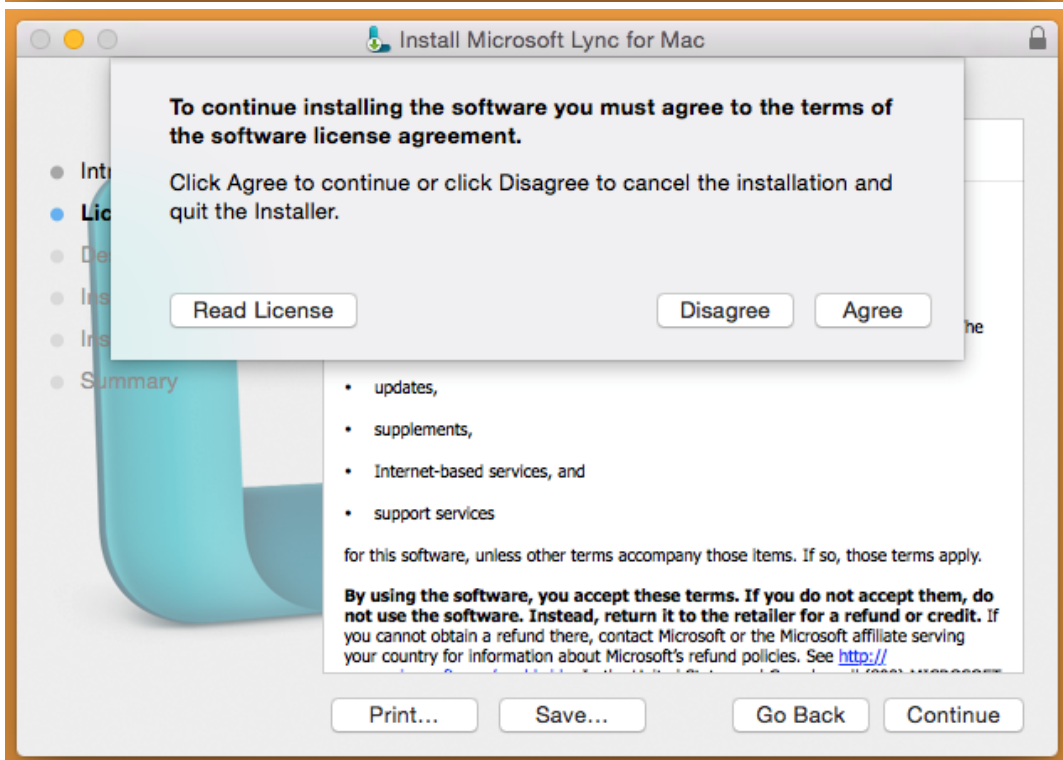

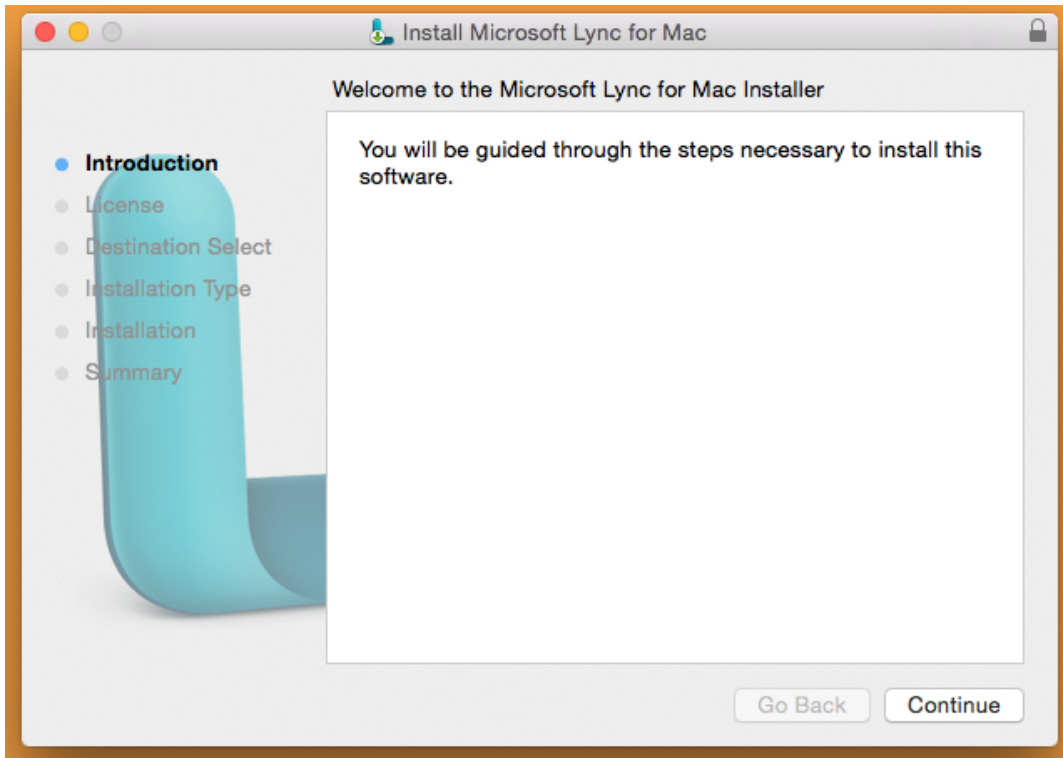

1. In the **Lync for Mac** sign-in window, type your user ID (username@clemson.edu) and password.
 2. Click **Advanced** .
 3. Under **Authentication** , clear the **Use Kerberos** check box.
 4. Under **Connection Settings** , click **Manual configuration** .
 5. In both the **Internal Server Name** box and the **External Server Name** box, type or paste **sipdir.online.lync.com:443**.
 6. Click **OK** .
 7. In the **Lync for Mac** sign-in window, click **Sign In** .
6. ** At Install choose **Save File** .

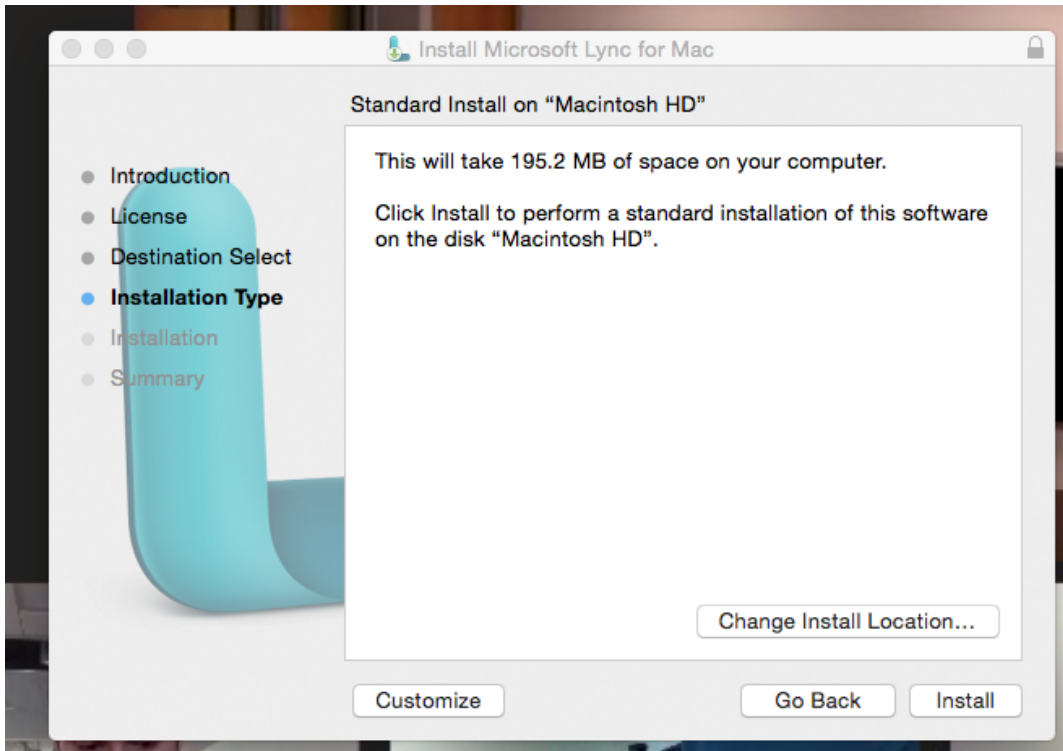

7. Double-click the Lync Installer.pkg

8. Follow the installer instructions by clicking **Continue**, **Agree** and then **Install**.

9. Enter the password required for software installs. The installer will begin, displaying a progress bar. A screen will display for successful installation, close the window.
10. When wanting to use Skype for Business, launch **Lync** .

[Instructions for Windows](#)

For **Windows 10** , the application should be under All Apps. Open it and skip to Sign in for the first time below.

For **Windows 7** , follow the steps below:

Note: If you're running Windows 7 and 32-Bit Office 2016, choose Lync Basic 2013 (it will change to Skype for Business once installed)

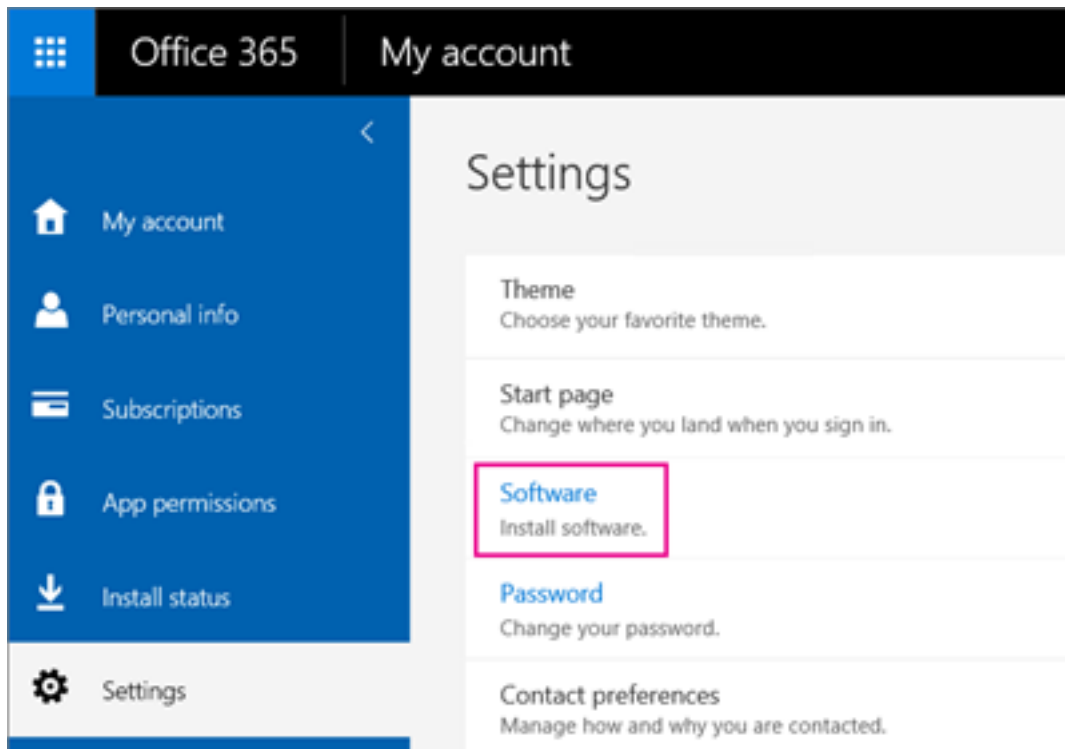

1. Sign in to Office 365 by either going to <https://365.clemson.edu> or <https://portal.office.com>

and log in with username@clemson.edu.

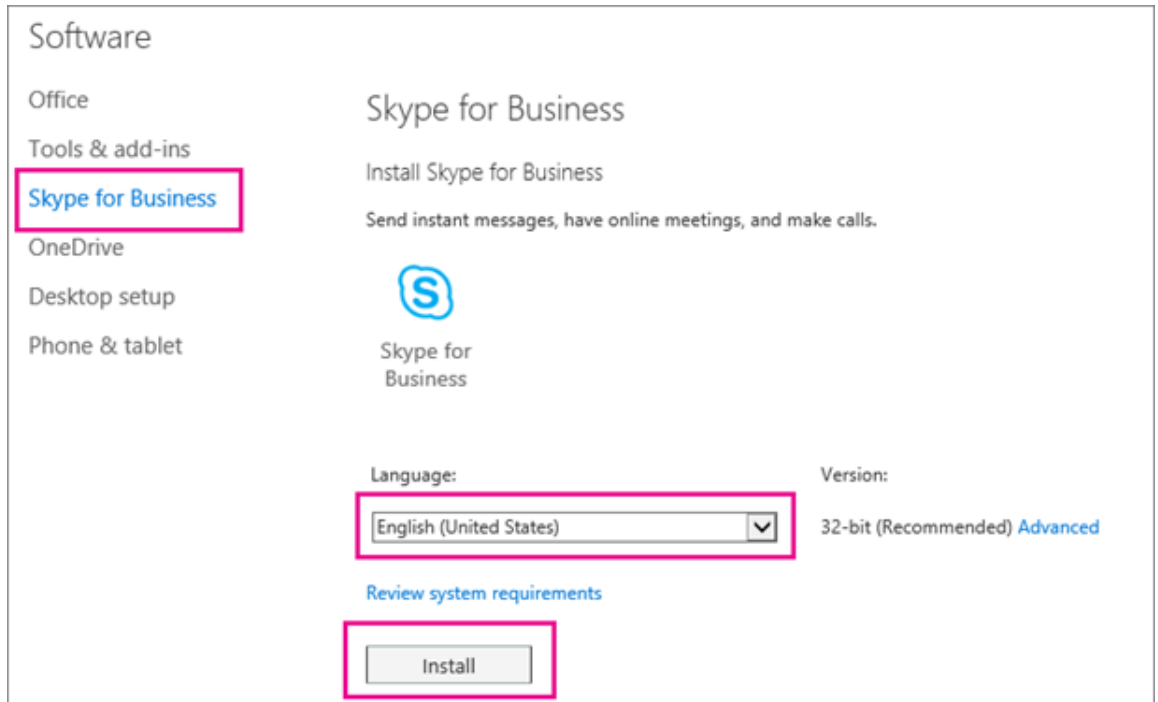

2. At the top of your Office 365 page, click the gear icon and then "Office 365."

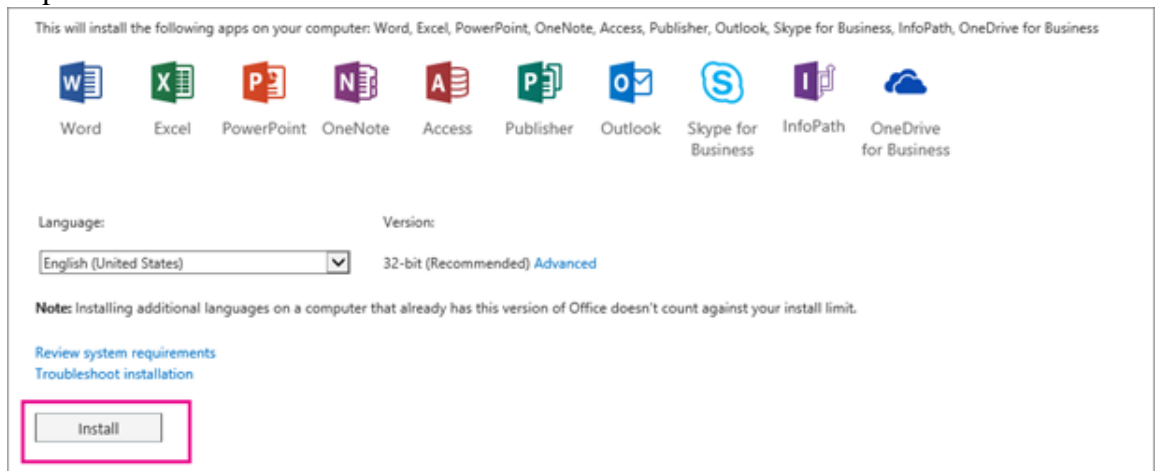

3. Choose Software.

4. Depending on your Office 365 plan:
 - If you see the following page, choose Skype for Business, choose your language, the edition that matches your other Office applications (32 bit or 64 bit - if you don't know, choose the default) and choose Install. Then go to step 6.

- If Skype for Business is bundled with other Office 365 applications, you'll see the following page. Choose Install to install the Office 365 suite of applications, including Skype for Business. When you're done, go to Sign in for the first time at the end of these steps.

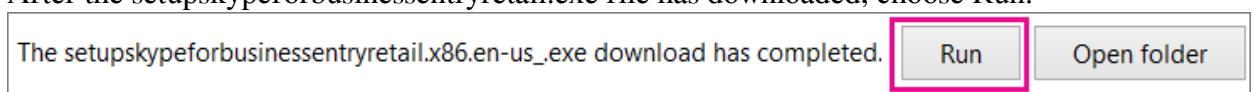

5. At the bottom of your screen, choose Save as to download the setupskypeforbusinessentryretail.exe file to your computer.

IMPORTANT : Note where you saved the setupskypeforbusinessentryretail.exe file on your computer. If Skype for Business stops during setup, this is where you go to re-run it.

6. After the setupskypeforbusinessentryretail.exe file has downloaded, choose Run.

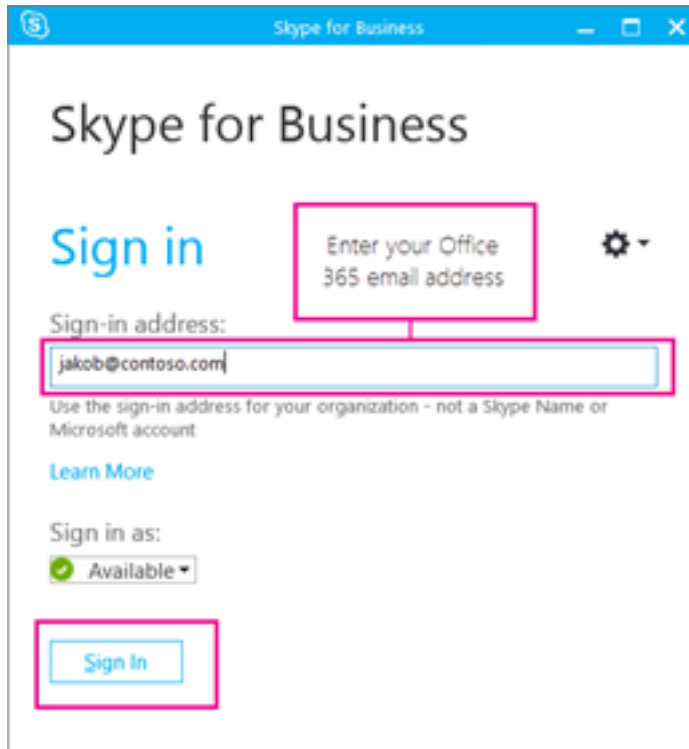

The Office installer starts, and displays a message that it's installing Office. However, it's only installing Skype for Business. It is not installing all of Office.

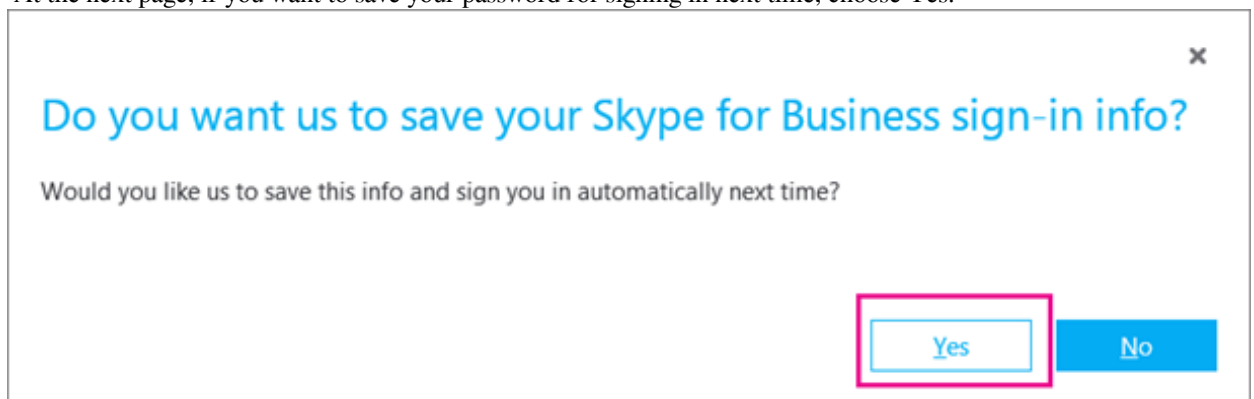

7. When the Office installer is finished, it displays a message that Office was installed on your computer. However, only Skype for Business was installed. Choose Close.
8. Launch Skype for Business. At the First things first box, if you accept the licensing agreement, choose Accept.
 - You can install Skype for Business on up to 5 PCs. To install Skype for Business on another PC:
 - Log on to your next PC.
 - Sign in to Office 365 by either going to <https://outlook.com/owa/clemson.edu> or <https://portal.office.com> and log in with username@clemson.edu .
 - Repeat the steps listed in the above procedure to download and install Skype for Business.

Sign in for the first time

1. At the Skype for Business sign in page, enter your Office 365 user ID username@clemson.edu and password, and then choose Sign in.

2. Enter your password for Office 365.
3. At the next page, if you want to save your password for signing in next time, choose Yes.

4. At the Help Make Skype for Business Better box, choose whether to allow us to collect error logs and device configuration info.
5. Click the gear icon for preferences and to select audio and video devices.
