No Device for Duo? Duo Hardware Tokens and Yubikeys

620 Faye Buckley June 28, 2022 [Two-Factor Authentication](#)

The CCIT Support Center will have Duo D-100 hardware tokens available for $20 plus $1.40 tax. These devices are the preferred alternative to a mobile device or phone because they will work for any situation or application. In the event a student or employee does not have a suitable mobile device or landline, these can be purchased at the CCIT help desk. It is our suggestion for employees that the department purchase this token for their employee. If the employee later leaves, the token can be returned to the department and assigned to another user. Accepted forms of payment are credit/debit cards or an Interdepartmental Order (IDO)

Alternatively, you are welcome to purchase a personal YubiKey to be used for 2FA. A list of model prices and feature comparisons can be found on the vendor's website here: https://www.yubico.com/products/yubikey-hardware/. If you purchase another model that supports event-based HOTP, a Duo admin will need to enroll the device for you. This can be done in the CCIT Support Center.

If you have more questions, email ITHELP@clemson.edu or call 864-656-3494.
