

HOW TO: Embed my.Clemson map into a CU Events (Guidebook) guide

Article Number: 635 | Last Updated: Fri, Nov 3, 2017 at 11:40 AM

Guide owners should utilize the my.Clemson map embed (rather than Google or Apple Maps) as the my.Clemson map includes on-campus locations and other useful features. **Step-by-step guide** Embed the map in your guide using a web view. Open the Guidebook Builder and select the desired guide. Select *Build Your Guide*. Select *Add a new feature to your menu*. Scroll through the features list and select *Web View > Add*. Select the new Web View and edit the title to read *my.Clemson Map, Map, Campus Map,* or any variation. Enter the following link in the Website URL field: <https://my.clemson.edu/?embed#/map>. Select *Save*. Select *Settings*. OPTIONAL: Select *Open in Browser* so that the switch is blue with a white check mark (selected). If you choose this option, your guide users will be router to their default web browser to view the map. Select *Change Icon* and change the icon from the default web view icon to an appropriate map icon. Select *Save*. Publish the guide and test the web view on various mobile devices to ensure the map embed is functioning properly.
