

Amazon AWS Educate Program

Article Number: 714 | Last Updated: Wed, Sep 29, 2021 at 10:13 AM

Clemson University is now an Institution Level member of AWS Educate. The Enterprise License for Amazon's [Amazon AWS Educate Program](#) provides faculty with instructional materials and cloud credits that can be used within your classes; all you and your students need is your Clemson email address — no credit cards or request forms. Anyone with an @clemson.edu or @g.clemson.edu email address can get an account with AWS Educate and benefit from Amazon's on-line training modules. Faculty can incorporate existing modules into course AWS Educate courses. Training students how to program? Think about teaching the class using AWS Educate systems instead of building a lab in your department. AWS Educate can be integrated with [Canvas](#). NOTE: These courses have a limited time to live; perfect for being part of instruction, but not suitable for research. **SPECIAL FACULTY TRAINING EVENT** Mike Bryant from AWS Educate Higher Education Program was at Clemson to demonstrate AWS Educate and show you how to use some of the modules available, such as Machine Learning & Artificial Intelligence, Building Scalable Architectures, Big Data & Analytics. Click below to view the recording — there was a delay due to technical problems so the presentation starts about 20 minutes in — just move the video slider. To contact AWS Educate, contact Mike Bryant, AWS Educate Community manager: mikebry@amazon.com [^](#)
